

Aluminum Fire Damper

Aluminum 6063T5

Features

- In the event of a fire system discharge, the Fire Damper provides for nearly instant actuator closure of ventilation openings, will prevent dilution of the extinguishing agent and prevent additional oxygen to enter the space that spread the fire.
- Rectangular Fire Damper is made of aluminum 6063T5 with power coating. It combines LF spring-return actuator.
- Dampers may also be manually actuated and reset from outside of the damper casing.

LF spring-return Actuators 10 NM,
95 ° angle of rotation,
universal clamp for damper spindles.

AC 24~240V / DC24~125V 50/60 Hz
Running time : motor 75s
Spring return approximate 20s
